Re: Yucca Mountain Repository

Dear Mr. Secretary:

It is mandatory that a nuclear waste repository be activated soon. I strongly urge you to recommend to President Bush that the Yucca Mountain repository be approved.

There are a multitude of reasons for prompt construction of a repository. There is no need for me to review them with you.

Just know that I, for one, think that we are delinquent in not having established a nuclear repository already.

Thanks for listening.

Respectfully,

C.T. Carley, Ph.D., P.E.
